## **DECLAWING**

Declawing your cat is NOT like giving it a manicure - it is a serious, painful, and unnecessary surgery. There are many health risks associated with the procedure, as well as the potential of lasting behavioral effects. The good news is that with a little preparation, unnecessary scratching is easily preventable! To read more about declawing, its effects on the cat, and alternative solutions to cat scratching,

SoftPaws and Sticky Paws are an effective, safe, and humane alternative to declawing. Remember, though, always provide your kitty with adequate scratching posts!
